Web developer

- Throughout my academic journey and early career I have achieved several milestones that reflect my dedication to learning and growing as a developer and problem solver I have completed internships at CodeAlpha and Stacktech where I worked as a web developer gaining realworld experience in building modern and efficient websites I have earned certifications in Python C static web development responsive design and dynamic web development which strengthened my technical foundation I also completed a UIUX design workshop and received a certificate in data science and analytics from HP Life company and another in coding and development from Deloitte company I have worked on projects such as a Cloud Kitchen Management System and a queue based data structure project which combined my skills in both computer science and business thinking These achievements demonstrate my passion for technology creativity and continuous improvement

WORK EXPERIENCE

CodeAlpha

CodeAlpha is a technology driven organization that provides internships and training programs to help students gain real time experience in software development and web technologies

Web developer Intern • Internship

As a Web Developer Intern at CodeAlpha I was involved in creating static and dynamic websites using HTML CSS JavaScript and Python I designed responsive layouts and implemented features to improve user experience This internship helped me build strong web development skills and exposed me to real world project environments

Stacktech

Stacktech is a software development company that delivers digital solutions across various domains with a focus on full stack development and web technologies

Web developer Intern • Internship

At Stacktech I worked as a Web Developer Intern focusing on frontend and backend development I created responsive user interfaces and collaborated with the development team to build user friendly websites and applications I improved my technical skills and learned how to apply industry practices in live projects

EDUCATION

B.Tech in [Computer science and business system]
